[arriola.dev@ooutlook.com](mailto:arriola.dev@ooutlook.com)

<https://jaime-arriola.netlify.app>

I've been doing Frontend development for more than 1 year and I enjoy delivering only the best possible results on my job, learning new technologies and sharing what I know.

## Skills

React JS | Redux | Storybook | GraphQL | Flutter | Figma | SCRUM | Javascript ES6 | Git | Github | SaSS | HTML | CSS

## Work Experience

### Frontend Engineer - Hugo Technologies

Dec 2020 - Apr 2021

#### My tasks on this job were:

- Contribute to the User Stories development process, assist with acceptance criteria definition, and ask clarifying questions.
- Write high quality React JS code ensuring that it is clear, concise, well structured and efficient to meet UI/UX designs.
- Update old components & develop new components using storybook to write use cases and documentation.

#### My achievements:

- Develop from scratch a web application with React JS using UI designs made on figma to help improve a process that the business is going to use in several countries.
- Refactor a Flutter application so the code improved its quality and maintainability meaning less time for new developers to create or update features.

### Instruction Auxiliary - Aeroman

Feb 2019 - Aug 2020

#### My tasks on this job were:

Provided IT support on:

- Aeroman's Learning Management System (LMS) as Main Administrator
- Airbus competence center and also on computer based training classrooms.

#### My achievements:

- Conceived and customized the user interface of the LMS by using HTML, CSS and JavaScript
- Coached to technical instructors and aircraft mechanics to deliver and take online courses
- Due to COVID-19 situation, I developed plans on how to deliver online training to people, so nearly 200 employees were trained online so Aeroman saved money and time on training people.

### Application Monitoring Analyst - Dataguard group

Feb 2018 - Jan 2019

#### My tasks on this job were:

- Deploy application performance monitoring (APM) tools on Linux Servers.
- Assessed APM Tools to check performance on Java applications deployed in Aeroman application's servers.

#### My achievements:

- Conceived which tool was the best to analyze application's transaction through all the infrastructure components, in order to reduce response times, errors and downtimes of in-house development applications.
- Collaborated in the implementation of the Aeroman's Learning Management System (LMS)

## Education:

### University of El Salvador - Electrical Engineering Bachelor Degree

2008-2015

#### Online courses:

- [React - The Complete Guide \(incl Hooks, React Router, Redux\)](#)
- [React Front to Back](#)
- [Scrum Fundamentals Certified \(SFC\)](#)
